storage solutions

## The Client

Glatfelter Memorial Library was expanding its book collection and wanted a more space efficient shelving system to house the increased volume of books.

The shelving needed to be durable and aesthetically pleasing, easy to access, and easily adjustable for future growth.

## Storage Solution

4Post™ Library shelving was chosen, due to its unique closed end panel design. Between each set of shelves is an end panel that prevents books from falling off the end of the shelves and between the units.

The shelves clean look and potential for great storage capacity made it an ideal storage solution for the library floor.
