storage solutions

The Client

When Kennesaw State contemplated starting a football program, they evaluated their proposed equipment storage and repair facilities and realized the area they were given was not large enough to meet their needs.

The room also had a steel support column that made it difficult to accommodate both an athletic storage area and an equipment repair station.

“The storage system Datum installed for us here at Kennesaw State has gone above and beyond our expectations. They were able to design and put together a system that takes care of all our needs and wants for our football equipment room. Without this system in the equipment room, we would not be able to function as well as we do for our student-athletes and coaches.” — Head Equipment Manager, Kennesaw State University

Storage Solution

Datum Storage Solutions worked with the staff at Kennesaw State University to provide a high-density mobile system to meet their usage requirements and fit their unique space.

With a few new features, including a Universal Modular Panel System, custom shoulder pad storage, an area to maintain and repair helmets and a uniform repair station, the Kennesaw State Owls are always game-day ready!
