storage solutions

The Client

During the construction of their new school, the athletic department of Lower Merion High School decided on a new storage system.

The needed a more organized, more centralized area for storing their athletic team equipment and they wanted to upgrade from their wood racks, bulk shelving, and bins.

Storage Solution

A MobileTrak3® System equipped with 4Post™ Shelving was chosen to be housed in the small equipment room adjacent to the school's gym.

The MobileTrak3® gave them the storage they needed in the small space they allotted, while the 4Post™ shelving allowed for the storage of hanging and folded uniforms, helmets, balls, and other sports equipment.

The new system aids the athletic directors and coaches in keeping inventory up to date and in good condition.

The school opted for end panel graphics to show their school spirit, and the entire system's colors were chosen to match the school's team colors.
