

Heavy duty movable carriages eliminate the need for multiple aisles in a traditional stationary set up. Can accommodate all lines of standard Datum shelving, as well as shelving systems from other manufacturers.

CONSTRUCTION

Carriage

- 11 gauge wheel channel and cross member
- 13 gauge carriage sides
- Designed to carry a maximum of 1,000 lbs per linear foot
- Modular carriage is comprised of shelving supports, side channels, and cross members
- Lengths are created by bolting sections to one another
- Side channels have no visible fasteners for a clean finish
- Anti-tip and seismic options available
- Electrical or mechanical assist operation
- Single, double, and triple reduction ratios standard, additional gear ratios are available
- Powder coated for durability and longevity

Features

- 5" diameter, double flanged wheels are machined from C1045 cold rolled steel
- All wheels on one side of the carriage are driven by a common 3/4" solid steel drive shaft for smooth, trouble-free operation
- Each wheel is fitted with 2 sealed lifetime lubricated bearings for smooth operation
- Modular design allows for easy reconfiguration when necessary
