storage solutions

The Client

Relocating to a new facility left the Sandy Police Department in need of a more consolidated and better organized storage system in two different areas in their new building.

Their needs were specific: they wanted to get the most out of the space they were allotted for storage and they needed to do it within their budget.

Storage Solution

The solution was to install two MobileTrak5® high density systems equipped with 4Post™ shelving in both the records area and in evidence storage.

The new systems provided more than adequate storage, security, and organization that was previously missing from these storage areas.

Ultimately, the Sandy Police Department was able to maximize their storage capacity in the areas allotted with plenty of excess capacity for years to come.
