Lower Anti-Tip Bi-Slider

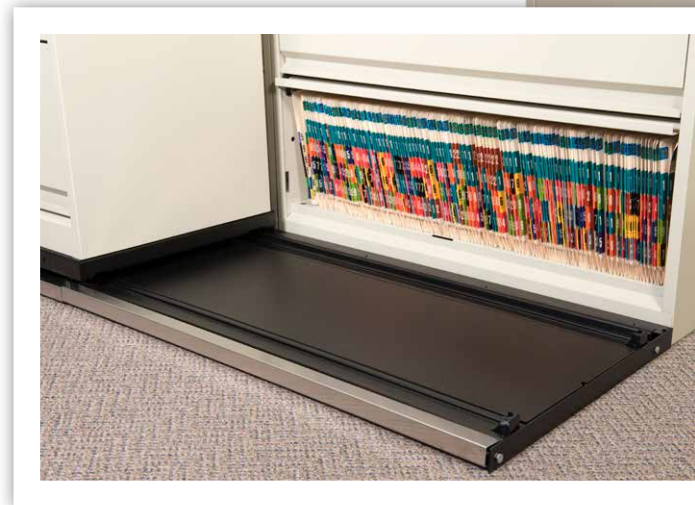

RELIABLE STABILITY SOLUTION

Datum's lower anti-tip bi-slider is a discreet, track-mounted stability solution for lateral filing cabinets, 4Post™, Stak-N-Lok™ or other shelving units that eliminates the need for obvious, overhead anti-tip systems. Fabricated from 11 and 16-gauge cold-rolled steel, this carriage component is designed to prevent or prohibit top-heavy, moveable filing and storage units from falling forward when doors or drawers* are open.

*Interlocking drawers only.

FEATURES and BENEFITS

- Datum's lower anti-tip system may be used in conjunction with or along side units with an overhead anti-tip system.
- System can be leveled as needed.
- Lower **anti-tip componentry can be added** or retro-fitted to tracks and carriages manufactured after December 1, 2014.
- The track resembles standard, bi-slide decking and carriage.
- Fabricated from **11 and 16-gauge cold-rolled steel**.
- Powder-coated finish.
- Available in these **standard widths**: 24", 30", 36", 42" and 48 inches.
- Available in **standard depths** of: 12", 15" and 18 inches.
- When combined with carriage widths ranging from 24"-48", the **versatility** of this new bi-slider system allows for hundreds of different storage configurations.

Powder-coated steel

Anti-tip safety

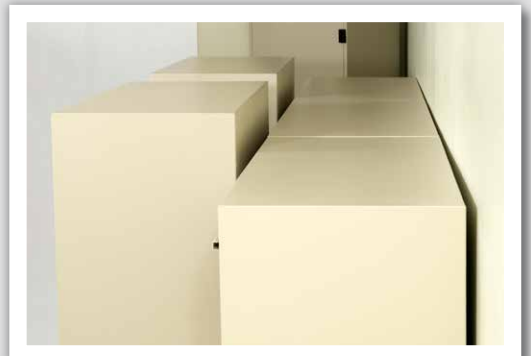

Cabinets are sold separately and are not included with bi-slider system.

Easily leveled track

No overhead components

CUSTOMIZABLE, VERSATILE, DURABLE AND GUARANTEED
