# TrakSlider™

TrakSlider™ Systems can more than double storage capacity by converting stationary files into moveable systems that require just a fraction of the original floor space. Datum's unique design eliminates fixed aisles between shelves, which reduces retrieval time and increases user efficiency.

Thanks to ball bearing construction and four wheels per carriage, just a simple push of the hand effortlessly moves files to the side to access information stored in the rear of the unit, all the while half of the system still remains accessible.

A variety of configurations offers a wide range of space-saving storage possibilities from three to twenty-five shelving units all housed within one TrakSlider™ System!

TrakSlider™ Systems are one of the most flexible and efficient ways to increase filing capacity for any document filing or storage related application. Systems are compatible with all lines of Datum shelving.

## Quiet Operation

TrakSlider™ Systems are engineered with specially designed rubber end-stops and smooth rolling wheels for quiet and easy access to materials.

## Easy Expansion

Modular track allows for easy expansion of stationary shelving to a BiSlider, a BiSlider to a TriSlider, and a TriSlider to a QuadSlider. Track can also be expanded laterally to increase storage capacity.

## 4Post™

Adjustable shelves provide flexibility to store everything from file folders to inventory.

## ThinStak®

Different media options and sizes make it a storage solution for almost any application.

## Easy Installation

All Datum shelving includes prepunched tops for a hassle-free installation of TrakSlider™ Systems.

## Anti-Tip Safety

Systems feature an overhead anti-tip mechanism to ensure safety and enhance the ease of movement of shelving sections. **Lower Anti-tip technology is also available.**

## Durable Finish

Powder-coated all steel track and decorative stainless steel cap provide a durable and aesthetically appealing look.

## Leveling Track

Reinforced steel track equipped with leveling guides every 12 inches on center creates a solid foundation that allows for smooth operation despite non-level floors. No permanent attachment to the floor is required.

## Heavy Duty

One piece welded heavy duty steel carriage with high density Delrin® wheels creates a durable base for moveable shelves.

**Stak-N-Lok™**  
Tiers offer locking retractable doors for security.

**Vu-Stak®**  
Stackable tiers are available in slanted or straight view to better fit your filing needs.
