storage solutions

The Client

During the renovation of their building, the Woodway Police Department found that they needed a convenient place for their officers to store their personal belongings in their locker room area.

Datum had the custom solution they were looking for.

Storage Solution

Datum designed a new product to give the Woodway PD officers the storage they were looking for. What emerged from the process was the 4Post Locker™.

This locker featured a lockable hinged door on the outside, and shelves, a garment rod, and locking drawer on the inside. Each unit even features a powerstrip for officers to plug in and charge their electronics while they're on duty.

The new lockers lined the walls of the locker room and gave the officers a place to store their personal belongings, including street clothes, hanging uniforms, shoes, toiletries, cell phones, and other items in a secure environment.
