DATUM[®]
storage solutions

The Client

The York County Archives (YCA), in York, Pennsylvania, is responsible for the storage of many types of media. The YCA was looking to update their stationary filing system when moving from the County Courthouse to a remodeled storage building. Datum helped them make the best use of their available space, while still allowing them the ability to store various kinds of media.

Datum utilizes design programs to create 3D color renderings for customers to see exactly what their unique storage system will look like in their facility, from size and scale to color and aesthetic appeal, before the system is purchased.

Storage Solution

The YCA chose a mechanical assist MobileTrak5® System equipped with 4Post™ Shelving, which provided the archives with the flexibility to store different types of media. The system utilizes more than sixty carriages to store end tab file folders and archive storage boxes. Even though some of the carriages measure more than thirty-eight feet long, they can still be moved with a simple turn of the handle, thanks to MobileTrak5®'s optional mechanical assist. The YCA also allocated additional carriages for future expansion of filed materials.
